

Missing Features

- Lazyload for Image Elements
- Button Hover Animation
- Testimonials (is only hardcoded)
- Borlabs Cookie Notice (don't know if the active cookie notice is enough for American/Mexican laws, but definitely not for European)
- ~~Woocommerce Cart & Checkout (as told by timacum)~~
- ~~Booking iFrames (as told by timacum)~~

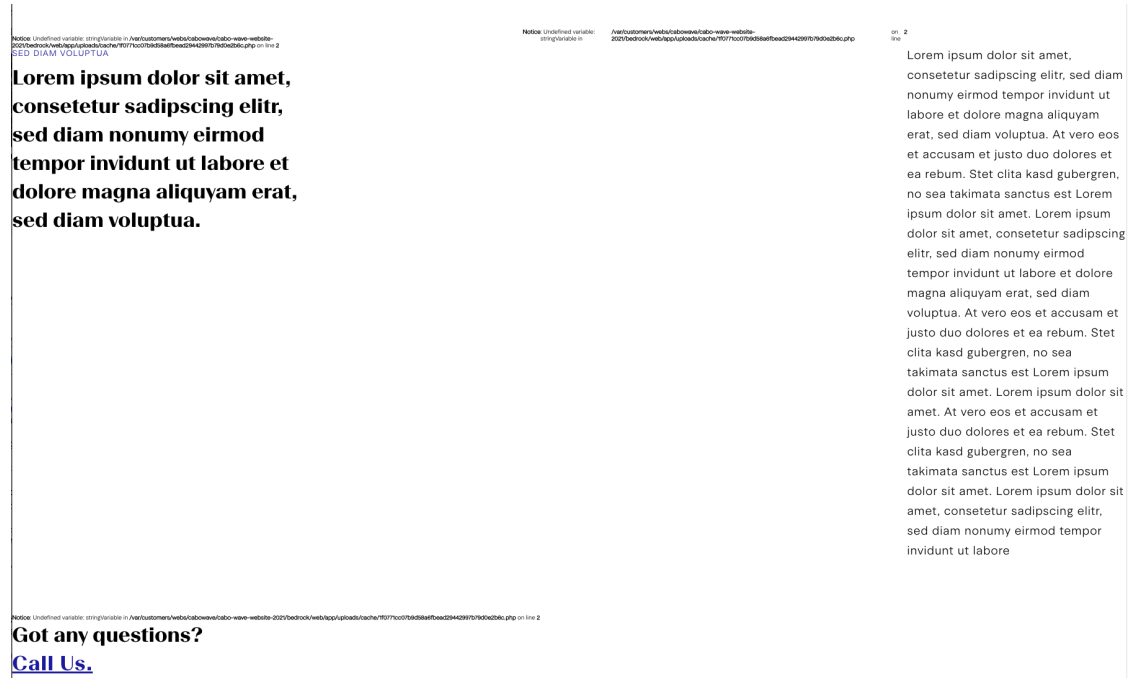

Errors

- Common
 - Page header not full screen height
 - Read More in page header not working, should always have "cursor: pointer;"
 - Headlines/Titles fields shouldn't be WYSIWYG fields, just normal text fields or text areas, as the design shouldn't be breakable by wrongly configured WYSIWYGs
 - Undefined variable notices (I know they don't get shown when set to production, but it shouldn't happen. You can use custom @exist blade directive for checking)
 - Required fields for displaying elements should also be set as required in the backend.
- Frontpage
 - Headline Images Element

```
</section class="hero-parent">...</section>
</section class="container headline-images text-left <br
/>
<b>Notice</b>: Undefined variable: classname in <b>/var/cu

```

- White margin between map element and footer

- <https://cabowave.moma.conversory.net/maps/>
 - Map needs more than 10sec to load
 - Undefined variable notices
- <https://cabowave.moma.conversory.net/our-guestrooms/>
 - “VIEW OUR ROOMS”/Read more not working
- <https://cabowave.moma.conversory.net/amenities/>
 - “VIEW OUR OFFERS”/Read more not working
 - Undefined variable notices
 - Lightbox Slider not displayed correctly, lightbox not working
- <https://cabowave.moma.conversory.net/job-vacancies/>
 - Job infos should not be in template, but in the jobs itself. It should load all jobs automatically.
 - Arrow right missing
 - Undefined variable notices
- <https://cabowave.moma.conversory.net/food-beverages/>
 - Undefined variable notices
 - “VIEW OUR OFFERS”/Read more not working
- <https://cabowave.moma.conversory.net/shop/>
 - Category Filtering not showing active category
- <https://cabowave.moma.conversory.net/about-us/>
 - Undefined variable notices
- <https://cabowave.moma.conversory.net/about-cabo/>
 - “LEARN MORE”/Read more not working
 - Undefined variable notices (breaks layout)

- Lightbox Slider not displayed correctly, lightbox not working
- <https://cabowave.moma.conversory.net/job/night-housekeeping-supervisor/>
 - Image on the right shouldn't move upwards, until it reaches the bottom of the body
 - File should be required too
 - Form submit not working (SMTP plugin is active and working)

- <https://cabowave.moma.conversory.net/product/straw-hat/>
 - Gallery not working
 - Unit Selection not working
 - Add to cart would be nice with AJAX and without reloading page
 - Notice: ID was called incorrectly

Smaller Fixes

- Lazyload in Slider; load next image before click
- Hero Parent/Video Header overflows and breaks site
- Read more button -> cursor: pointer
- WYSIWYG Editors all need "Delay initialization?" active, as it minimizes backend loading times
